DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. §121:

I. Claims 1-13, drawn to a method of transacting, classified in class 705, subclass

20.

II. Claims 14-18, drawn to a system, classified in class 705, subclass 34.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process—one that does not require debiting a traffic generator. Alternatively, the apparatus as claimed can be used to practice searching the Internet.

3. Because these inventions are distinct for the reasons given above, because the search required for Group I is not required for Group II, and because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Election of Species

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Represented by Figure 1;

Species B: Represented by Figure 2.

5. Applicant is also required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

6. Applicant is advised that a reply to this requirement must include both a chosen invention (Invention I or II) *and* an identification of the elected species and consonant with this requirement, a listing of all claims readable thereon, including any claims subsequently added in response to this Office Action or in any future amendment. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. §1.141. If claims are added after the election either in response to this Office Action or in any future amendment, Applicant must indicate which newly added claims are readable upon the elected species. MPEP §809.02(a).

Art Unit: 3627

8. Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
9. A telephone call was made to Brian M. Berliner on or about October 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
10. Applicant is advised that the reply to this requirement to be complete must include both an election of the chosen invention (I or II) to be examined even though the requirement be traversed (37 C.F.R. §1.143) in addition to the election of species (A or B).
11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew J. Fischer whose telephone number is (703) 305-0292.
